HECO
SCHRAUBEN

Safe and secure

THE WOOD SCREW FOR PROFESSIONALS

Flange head

Higher load transmission capability thanks to the increased clamping surface of the head

Shank ribs

Permit easy, stress-free driving (only with part thread)

Optimal thread pitch

For faster driving

Patented point with ribs

Reduced risk of splitting during driving

The advantages

- Higher load transmission capability thanks to the increased clamping surface of the head
- Fast and simple to use
- Calculation certificates via HECO® HCS or Calculation Service
- Approved and monitored product
- Assessed to BS EN 14592:2008 by TRADA Technology

Application examples

New
Now also available in 6 mm diameter!
